Eggscape - GDD v1
Author: Kazhmukan Tamerlan · Group OR1-1 · Game Development Fundamentals

Part	Eggscape
Title + pitch	**Eggscape.** A brave little egg escapes from a farm: it walks on tiny legs, tucks them in to roll at high speed, and collects coins to open the way out.
Genre · platform	3D physics platformer · Android (iOS later) · landscape
2D or 3D	3D. The hero is a rigged egg character with arms and legs and Idle / Run / Jump animations; it switches between walking and physics rolling.
Core loop	Run and roll through the level → collect all coins → the finish flag opens → reach the next, harder level
Controls	Joystick (bottom-left): move; slow = walk, fast = roll. JUMP (bottom-right): jump. FIRE (bottom-right, above JUMP): shoot. Pause II (top-right): opens the pause menu. Hearts and coin counter (top-left) are info only.
Content	4 levels (tutorial, farm, barn, boss arena), 4 hazard types (spikes, falling rocks, bombs, moving platforms), 2 enemies (patrolling horse, cow boss with 2 phases), 2 pickups (coin, heart).
Art and sound	Low-poly, bright cartoon farm. Models: Kenney Platformer / Nature / Food Kit, Quaternius Farm Animals (all CC0). Music: geoffharvey, Pixabay. SFX made in jfxr. One palette and one low-poly style for every asset.
MVP (week-15 build)	Main menu, 3 levels + boss, HUD with pause, enemy AI, saving unlocked levels and best coins, music and SFX with a volume slider, basic particle effects, Android build.
Cut list	Online leaderboard · skins shop · second playable character · level editor · multiplayer
Plan	W9: GDD, GitHub repo, mobile UI (menu, HUD, pause). W10: enemy AI (horse chases the egg, boss states). W11: level 4 + saving progress (PlayerPrefs). W12: sound (Audio Mixer, music and SFX sliders). W13: visual effects (coin sparkles, dust while rolling, hit flash). W14–15: team, ads, store release.
Roles	Solo until week 14: I do programming, level design, UI and art setup. From week 14 the team splits the roles from the lecture.
